### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The prior art fail to teach an etching process including the step of forming a plurality of micro-trenches at the edges of a residual hard mask layer in the exposed region, wherein the residual hard mask layer remains in the exposed region as claimed.
2. The closest prior art Tsai et al (6,878,646) teach a process for reducing the critical dimension of a hard mask but fail to teach a process of reducing pattern pitch on a substrate including the steps of etching the hard mask layer using a patterned photoresist layer, while a residual hard mask layer remains in the exposed region and a plurality of micro-trenches are formed at the edges of the residual hard mask layer in the exposed region as claimed.
3. Another closest prior art Zheng (USP 6,475,922) teaches the use of a hard mask (230) on a material layer of polysilicon (220) to be etched using a pattern photoresist masking layer (240)(see figures 2A-2C) but fails to teach leaving a portion of hard mask layer in the exposed region (250) in which micro-trenches are formed at the edges or along the sidewall of the residual hard mask layer as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
